

Autodesk Subscription Center

New improvements put the power in your hands.

We listened to what Subscription customers told us about how they work and interact with us online. With these suggestions as our foundation, Autodesk has transformed Subscription Center to better meet customer needs. So what was once a very valuable tool has now become an essential resource for extending the value of your Autodesk software while enhancing your productivity.

Visit www.autodesk.com/subscriptionlogin and you'll see that it now features more powerful and intuitive ways to optimize your investment in Autodesk software, including:

Single sign on.

Just log in once and go where you need—whether it's Autodesk discussion groups, AU Online, labs, communities, or more, across many Autodesk web properties.

Content tailored to your needs.

Subscription Center now delivers timely content based on your industry, Subscription level, community, and more. So you get the resources most relevant to your job.

Fully integrated Alias content.

It's faster than ever to find and use all of the Annex features and services because your initial login provides instant access. No additional login required.

More frequent content updates.

Not only is there more content on Subscription Center, but it's also refreshed more frequently. So you get access to the best tools and information as soon as they're available.

Not yet a Subscription customer?

Subscription helps protect your investment in Autodesk software by keeping you up-to-date with every release and product enhancement in a cost-effective way.

Specifically, you enjoy:

- **Automatic software updates** at no additional charge for products on Subscription.
- **Predictable budgeting** because your software costs are known for the term of your Subscription.
- **Flexible software licensing** that lets employees access software in the office or at home and extends previous version use enhancement to designers.
- **Exclusive product extensions** that provide modular enhancements for added functionality to some software.
- **e-Learning lessons** that give you a quick and easy way to learn about your software's features and functionality.
- **One-to-one web support** with Autodesk support technicians for answers to installation, configuration, and troubleshooting questions.
